

Test Cases:

Section: Suggested Locations

Title: Verify work or home suggestion based on time

Preconditions:

- User has neither work nor home location configured
- Set the phone time between 6am and 2pm

Steps:

1. Launch app
2. Verify the icon suggestion on the address search bar is for work
3. Tap on the work icon
4. Verify the suggestion is to enter work address
5. Close app
6. Set the phone time outside of the range mentioned in the preconditions
7. Launch app
8. Verify the icon suggestion on the address search bar is for home
9. Tap on the home icon
10. Verify the suggestion is to enter home address

Expected Results:

If the user has neither work nor home location configured and the time is between 6am and 2pm, the user should receive a suggestion to add work. Outside of that range, the user should receive a suggestion to add home.

Title: Verify work suggestion when home is configured

Preconditions:

- User has home configured, but no work
- User location is at home

Steps:

1. Launch app
2. Verify the icon suggestion on the address search bar is for work
3. Tap on the work icon
4. Verify the suggestion is to enter work address

Expected Results:

If the user has home configured, but no work, and the user is at home, the app should suggest adding a work address.

Title: Verify home suggestion when work is configured

Preconditions:

- User has work configured, but no home
- User location is at work

Steps:

1. Launch app
2. Verify the icon suggestion on the address search bar is for home
3. Tap on the home icon
4. Verify the suggestion is to enter home address

Expected Results:

If the user has work configured, but no home, and the user is at work, the app should suggest adding a home address.

Bug Report:

Summary or Title:

Work location suggestion based on time fails to work properly on the initial address search bar

Severity: Major

Priority: High

Preconditions:

- Confirm user has neither work nor home location configured
- Set the phone time between 6am and 2pm

Steps to Reproduce:

1. Launch app
2. Observe how the search bar icon is for home
3. Tap on the icon
4. Observe that the suggestion is to enter home address

Expected Result:

App suggests adding work location between 6am and 2pm for users with neither work nor home locations configured.

Actual Result:

App suggests adding home location at all times for users with neither work nor home locations configured.
